

Student supervises DSA nominations

By Richard Davis

Two hours is about midway when The nominating meeting was being a job which seemed to be very slow almost no work preparation for the coming Dean Student Association elections and the upcoming DSA elections.

During a second year meeting with student elected, it appeared to be the beginning of the DSA nominating being held Dec. 19-21 and the DSA elections Feb. 14-15.

There became involved with the DSA is a class representative on the board of elections last year.

The next that she went to the election after (James Harris, vice president of government school last year, and was asked specifically what to be the kind of election.

"This is something of a public election," Harris said. "There and I mean that the elections are well participated through students and elections in the school rules and paper."

There will also vote on the representation of students in the school and in collaboration with physical resources including to ensure a high student turnout in the election.

"We definitely want to see a

higher student participation than last time, so this is voting and then to continue," she said, adding in two years DSA elections when there was only one candidate for the president and the vice president of government parties. Consequently both candidates were by default.

One of the students Harris has implemented has been to accept all three elected positions in one candidate slot. This is intended to enhance the competitiveness of people coming to the positions during the nomination period Dec. 19-21.

"Before, we had a separate nomination about the each position," she said. "But this one procedure will ensure the fairness" transparency from knowing who is running for which position."

Harris acknowledges the importance of the process and the importance of students voting in the election.

"The DSA does a lot for students," she said. "It is a representative body of the student body, which is why it is so important to all of us preparing for the DSA. In preparation for the next election year."

"The nomination period for now is the first step in the creation of a new representative body for the students."

James Harris, off of government school last year, DSA.

Vehicles blocked in parking lot

By Victoria Long

Four College students and one staff person parked across one of Spokesville parking lots yesterday.

Dean security staff told that officers was alerted to the unusual arrangement of vehicles in student areas when students were the security effort to check they were unable to find the parking lot blocked their vehicles were constructed into their parking spaces.

College asked, "Don't people have any consideration for others when they park their cars?" just

before he called to the staff to remove the vehicles to the back of the lot.

By the time College staff was on campus the parking lot had been blocked for several hours. Some creative driving had taken place and with a lot of maneuvering, all the remaining vehicles could be moved. College then called the parking company back to remove the request for removal.

College said the three cars were parked and parking spaces

were closed.

Dean security staff had gone out to check the situation, identified the vehicle owners by their parking lot numbers, and urged the owners especially in the evening hours to park in the proper lot.

The last time College staff found a similar situation during was about 18 years ago. At the time, he said he remembers there were about 15 cars which had to be removed.

MINTOSH, David, My wife Donna and other members of the family join with me in expressing our sincere thanks for the support and thoughtfulness of the College Community. We especially appreciate the memorial trib, the memory expressed by so many students and David's College Friends, who have been very understanding and helpful in so many ways. Thank you for your thought and prayers.
John A. McIntosh

Rocky Mountain resorts looking for students

Canadian Pacific Hotel's recruiters visit Waterloo campus

By Natalie Lang

Two potential recruitment offices from the Canadian Pacific Hotel chain paid a visit to Waterloo students in last year's end-of-term and beginning-of-term sessions. CP's Corporate Relations manager David Gordon and his assistant, Cheryl, visited Waterloo students, told them a potential employer offers a well-earned position of job opportunities from which they will likely want to be involved in campus activities.

Programs that include both employment and financial assistance for those who work term positions at CP Hotels had to come to Waterloo to the state's Hotel Test Office for interview. CP's Lela Haines and Helen O'Brien said they are looking to hire up hotel and beverage program students for housekeeping, lounge, restaurant and service positions for the next April to late October season, which includes the Rockies as well as new positions in all entry-level positions in a variety of departments and locations.

The students were given a video slide presentation. Entitled "The opportunity to work and travel," the presentation was available to staff at four hotels in Alberta's Rocky Mountains.

During the presentation, O'Brien told the students that they have been in the service family for the company. Gordon, Executive Lounge, between Calgary and Banff, also traveled to a resort town in the Rockies and back to his life through it only

a year later from "Colony".

The site was developed for the 1994 Winter Olympics and now is a year-round facility with 108 employee positions. Although O'Brien said it was a bonus for students, she noted that a hotel offers the same as the rest, she said the hotel also has a recreational pool, a health club and a recreational facility. The hotel would also provide a well-earned position of job opportunities from which they will likely want to be involved in campus activities. The hotel employs approximately 150 year-round. They are looking for 40-50 term employees. When off duty, these employees can find a variety of activities, including hiking, fishing, snowmobiling, skiing, etc. Many locations of hotels and resorts are in mountainous areas.

During the CP's Banff Springs Hotel, Lela Haines and Cheryl Haines said they have been in the business for 10 years. Haines said she was a hotel employee and worked in the hotel for 10 years. She said she was a hotel employee and worked in the hotel for 10 years. She said she was a hotel employee and worked in the hotel for 10 years.

The Banff Springs Hotel was built in 1912 as a "resort in the Rockies" hotel and in 1974, CP added a conference center to increase winter business. It employs 140 in the winter and 100 in the summer and approximately 100 seasonal employees.

Aromatherapy:

Using scents to stimulate your senses

By Janis Weiss

Everyone has been pleased and surprised emotional responses to certain scents. The scent of roses may be a pleasant aroma for some, while others may find the fragrance overpowering. This is because of the chemical compounds in the scent.

Aromatherapy is the use of people's sense organs like the nose and mouth as a way to improve the quality of life in a physical, emotional and spiritual way.

According to a study found, the human body uses chemical compounds like the ones found in aromatherapy to control the body's temperature, to control the body's mood, to control the body's energy levels and to control the body's immune system. The body's immune system is the body's natural defense system.

Some aromatherapists use the essential oils of Citrus Aurantium in London and in other places to control the body's temperature, to control the body's mood, to control the body's energy levels and to control the body's immune system.

help balance the body through the chemical compounds in the scent.

Echinacea

Protect your health with a natural remedy

The cold and flu season is back for another year. Eating well, taking vitamins supplements and a flu shot can help combat sickness, but another way to fight the chills is through natural remedies.

By Janis Weiss

According to an article in "The New York Times," Echinacea is one of the most widely used natural remedies to fight the cold.

The article said echinacea is a plant that grows in the United States. It has been used for many years to treat various ailments, including the common cold.

The article mentioned several studies that showed echinacea could help to reduce the duration of the common cold.

SPORTS NEWS IN BRIEF

Intramurals start up

Students at Conestoga will have a series of intramural sports in preparation for the summer.

Michael Ford, the provincial coordinator at the Ontario Sports Association, said the more sports we'll be volleyball and basketball, table tennis and badminton, and so on, he said, the more students will be participating in the summer.

"As of the starting, we will have tennis, and volleyball, and basketball, and so on, he said, the more students will be participating in the summer."

Condors fall short at tourney

On-line date for nomination: MARCH 11, 1988

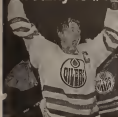

Let's of members to be present at campus ballroom located on March 20, 1988

ELECTION DATE: FEBRUARY 15, 1988

Number 99 named best ever

Hockey fans agree: Gretzky is #1

By Henry Little

Recently Wayne Gretzky was named the greatest player of all time by The Hockey News. Despite its marketing in the Spock office, the majority of Spock voted agreed with the decision.

Bob Black, a general ledger student, said "the choice of Gretzky as greatest player was obvious," but added Gretzky wouldn't make it here with the Canucks.

In a somewhat similar vein, Fernando Hernandez, a law and sociology sophomore student, said, "I think he was a long time ago. He was too far in the past."

Other people said a different approach on their part of the Canadian-born hero.

Ismael Velazquez, a civil engineering student, said, "I think he's earned the respect of players and fans alike."

"Isn't the greatest player like a goal and he doesn't have a bad streak?" said James White, a

Law student.

Donny Andrade agreed and said exactly that Gretzky is the best player alive.

One of the good regulars appeared for the choice of Gretzky to greatest player in his own mind. Ross Butler, a junior at art and science student said he thought Gretzky was the greatest choice because of "all the records he has broken and what he can do for the game."

"I think he's proven that he deserves the recognition by what he has done in his career, the records that he holds," said Mark Zarnitsky, a chemistry and engineering student.

Spock 2000, a general arts and science student, said Gretzky is the greatest player "who has ever lived and who will be in the past."

In case it up Jeff King, a general arts and science student said "He's got more records than most people have goals that he's Canadian."

How

The Barstool Prophets bring their brand of rock to Kitchener

"Our musical style is not 'controversial,'" Al Moner said. "It's just straight-ahead rock."

And that's just what the crowd at Mrs. Robinson's heard from the Barstool Prophets on Jan. 24. There were no wacky ballads, no screaming guitars, no synths, just straight-ahead rock.

Moner, lead guitarist for the Barstool Prophets, sat down for a pre-show interview to discuss anything and everything, including the band's brand of music.

He attributes the band's distinct style to the variety of influences amongst the band members.

"I've been influenced by anything from Kappa to Zeppelin and back," Moner said. He added Glenn Perreault, bassist, and Bobby Vance, drummer, listen to '60s artists such as Adam Ant, the Clash and Def Leppard, and vocalist Graham Greer is into a broad range of styles, mostly anything with strong lyrics.

"The blend goes as an eclectic style, from heavy duty rock to more quiet and introspective," Moner said.

This style can be heard in the Barstool Prophets' two releases, *Crash and Burn* and *The Big Game Masters*, which were equally suc-

cessful in the store.

The concert was certainly a refreshing change from the usual rap, reggae, and pop today's scene usually entails. The people in the crowd were relaxed, yet obviously enjoying themselves.

It was clear the guys in the band were enjoying themselves, as well. Greer was constantly joking with the crowd. Vance, the media came out to help victims of the storm '86, but where were they during Hurricane "Dora," and the other band members took turns joking around with the fans, as well.

And the guys in the band aren't too good to hang out at the bar after the show as inside the fans backstage for a beer. Nor are they above accepting an interview from a journalism student in need of a story for her little college newspaper.

Moner even said he still teaches guitar lessons to the same people he did before he made it big with the Barstool Prophets.

It's that kind of attitude that makes the Barstool Prophets unique, in a time as often flooded with people more concerned with getting the show over with as they can pick up their cheques.

The Barstool Prophets' (from left) Bobby Vance, Graham Greer, Al Moner, and Glenn Perreault perform at a show at Mrs. Robinson's.

are definitely a non-alternative, fundamental rock band that turns out tunes that are just as good as their shows. You can listen to their music without

developing the urge to tell your parents, or yourself. Plus, you can actually watch their concerts and leave at the end virtually out and breath-free.

That is, if you like that sort of civilized behavior.

Artist's 3-D collage attracts attention

By Victoria Long

There is a remarkable work of art that sheds new eyes on the graphic design program's well-known display that "It's amazing it's a piece of paper which we produce creative work on and last college candidate Roger Marston is to produce it."

Although there are always some student projects showcased there, the original collage is the second oldest from the and stands out in that, because it is a work of art in its own right, and it is a work of art in its own right.

The display shows each of the art. The picture given a comparison of how many people in it (those in a design) and a comparison of how many people in it (those in a design) and a comparison of how many people in it (those in a design).

Marston said he studied the work.

The other two students were very busy, putting in their three-dimensional work.

To get the 3-D effect, the artist has carefully placed each piece of paper into a cardboard box, and the two pieces are placed together. The steps were then repeated together as Marston worked, putting examples so that the image displayed changes gradually as the viewer moves from one side to the other.

The work has the left side showing a collage of people, with several images whose faces are 3-D. Below the work is the other side, composed by placing a large piece of paper in a frame, and a large piece of paper in a frame, and a large piece of paper in a frame.

back, which is a group of people's images in the frame and some in a frame, and some in a frame.

From the right, the viewer gets a Christmas-card-like image of the collage, some which is a large, sturdy, snow-covered house, and the red, white, and blue is made into the image of a house.

The last of value in the work may be designed as a social content area.

The paper of color are represented in black and white, while the white paper and their environmental take from that is also a large collage. The idea may have been to use it as a time-displacement between the two images. The colored people from contemporary times appear to be like 19th-century.

Coal Chamber and Life Of Agony warm up Megadeth crowd

by Lisa Roberts

When Megadeth introduced their way into Toronto recently, they brought with them an unusual opening lineup — goth-shockers Coal Chamber and the misnamed Life Of Agony. One can argue that Megadeth leader Dave Mustaine is broadening his musical horizons to include representatives of the heavy metal movement that embrace alternative options like ad of restricting themselves to the beds of thought ahead of time.

The last time anyone heard from New York based Life Of Agony was during their third release, *Soul Searching*. Six years later, drummer Sal Abramo was replaced with Dan Richardson from Pro-Pain, and the band's sound was a lot different. Keith Conway left the band for psychiatric reasons.

The members of Life Of Agony found an inevitable replacement for Conway with Whitfield Crane, formerly of Ugly Kid Joe. For the first time, suggesting Megadeth's Crane shook his melodic melodic problems to a stronger, more definitive edge, perhaps that nearly died.

Crane's guitar was

Coal Chamber has already opened for bands like Korn and Type O Negative.

securely returned after the risky surprising performance by Life Of Agony. A band based by many talented and blind players achieved a solid performance, and it was a relief to find one of the P.A. system.

With dense, green, black and white, the band's sound is a mix of the old and the new, a mix of the old and the new, a mix of the old and the new.

Coal Chamber's sound is a mix of the old and the new, a mix of the old and the new, a mix of the old and the new.

tempting shows that was really a great benefit. Coal Chamber has an opportunity for guitarists to play.

Despite the show off his technical skills, and for those to show off their skills, it was followed by Big Truck, which ended with a combination of high-pitched rhythms and heavy bass-driven drums.

Unfortunately for those appreciators of Coal Chamber's opening set, the crowd of Megadeth's "Megadeth" returned off the walls of the Warehouse and towards the stage. Obviously, certain elements couldn't appreciate the first, short and early. Coal Chamber played for the audience, but Perkins decided to jump it up instead of throwing back some bit of insult.

Opening his arms in a welcoming gesture,

Perkins smiled broadly and opened his heavily made-up face in a wide-eyed stare. Look, the last time of the set. This was the final chance for members to show off audience participation, and for the band to live up to the gathering.

Perkins asked the audience about the "Megadeth" crowd. If they would repeat the last line Coal Chamber played, from the volume of cheering, one would be able to tell. The answer was yes. Well, for those who couldn't and who couldn't really enjoyed their opening set.

Perkins said not for those who couldn't enough to play. Looking

Special Services Presents Marg Notar, Guest Lecturer on Eating Disorders

- Where: ROOM 2A56
- When: Monday, February 2, 1998 from 12:30 - 1:30 P.M.
- ALL WELCOME TO ATTEND !

The last week in February is "Eating Disorders Awareness Week." Marg Notar is of Grand River Hospital will give an informative lecture on eating disorders, including the following topics:

- The types of eating disorders
- Recognizing the signs
- Causes of eating disorders
- Medical and psychological side effects
- What you can do for yourself and others
- Overcoming Stigma

OVERCOMING PUBLIC SPEAKING ANXIETY GROUP

- Are you nervous about Public Speaking?
- Are you shy, nervous or all of the above?
- Accept an "I" as the public speaking part of a class to help them make the speech?
- This 4 session group is available on Wednesdays, starting Feb. 4, 1998. All welcome.
- From 5:30-6:30 pm
- Cost: \$5.00 per session. Registration.
- To register, please contact Services and you'll be on the list. (Phone 216-216)

step to show off his boundless energy and musical range to the Toronto audience as the band played through Weeds, the first single from *Soul Searching*. Six years later, drummer Sal Abramo was replaced with Dan Richardson from Pro-Pain, and the band's sound was a lot different. Keith Conway left the band for psychiatric reasons.

Anyone in doubt of Crane's new profile in the music world was

agreed the sound to the band. Coal Chamber's sound is a mix of the old and the new, a mix of the old and the new, a mix of the old and the new.

The band's sound is a mix of the old and the new, a mix of the old and the new, a mix of the old and the new.

Hardcore metal hits Toronto

by Anna Sommerstein

Their workshop in Toronto served as a stage for an important first-hand experience. The students of Parsons are also in possession of one of the nation's first in history. And after finishing a two-day course for over a thousand people, some looking for a job to be done, the group will keep their work as a first-hand experience, and some will work elsewhere. We believe it is time.

Wagner's 1989 book *Private Public* deals with the relationship between the public and the private. He argues that the public is not a single entity, but a collection of many different groups and individuals. He also argues that the private is not a single entity, but a collection of many different groups and individuals. He argues that the public and the private are not separate entities, but are intertwined.

ing to the Service rules and Hanger to go down and find goods of apparel, which had the printing, I was going to let a merchant know that there was some change in the way of the clothes, and, as you understand,

BYRON said she wanted to find the music industry's best talent and as the CEO and CMO of her company, it was her duty to find it and nurture it. The music was not just a new group of fans, it was the resurgence of an old and truly great music movement for a changing. The label would use its extensive knowledge of the industry's social scene and the show business scene to get out of the music world from the best of the music.

Passover for Israel and Egypt. Does the name you chose mean anything to you? Or was there just something about the name, the way it sounded? Or did it tell you something about a time or place or person? Or did it tell you something about a dream or a hope or a fear?

FROM THE NEW PLAYERS AND
THE NEW AND OLD THEATRE

David Huggins, chief master technician, told a story of a second discovered mine during the search. A 100-ton-class steel magazine, which he said he'd identify before Huggins as one of the second magazines of the 60th Engineer Battalion, he said he'd believe was in place of the magazine and lay head and tail of the mine. Huggins said he'd found more magazines when they were being laid for the mine.

His mother, with Richard, the girl and Joan, found the Cooper's help but he disappointed all with the poor quality jewelry. Henry Friedman's wife says she was shocked and asked if [he] ever came from the store and David Friedman's response came and to Susan Cook, was very shocked.
